

When we visit, we will ask you questions regarding your health and the health of those with whom you are in contact. These are the same questions every health care organization in the city is asking, and are recommended by our Governor and the CDC. These questions include:

- Have you or anyone in your household traveled internationally within the last 14 days to countries with sustained community transmission?
- Have you had contact with:
 - Anyone with signs or symptoms of a respiratory infection, such as a fever, cough, and sore throat?
 - Anyone with a temperature of 100.4 or greater?
 - Someone with or under investigation for COVID-19, or who is ill with a respiratory illness in the last 14 days?
 - Someone who resides in a community where community-based spread of COVID-19 is occurring?
